September 16, 1975.

Dear Mr. Lindblade,

Thank you for the reception report dated September 8, 1975.

Radio Station CHOO has been on the air for about eight years, transmitting 10 kW of power on a carrier frequency of 1390 kHz. Our five-tower antenna array is located on the north shore of Lake Ontario, about thirty miles east of Toronto.

Programming is basically country music, although at present, we are carrying some ethnic shows.

Thanks again for the report, and I wish you continued success with your DX'ing.

Sincerely,

Robin Jackson

Chief Engineer
