## RADIO 1370

## CBS

This will verify your reception of (WCOA-AM), (WJLQ-FM)  
on Sept. 23 1975.

WCOA operates on 1370 kilohertz with a full time power of 5kw. We use three equally spaced, in-line towers, with equal overall heights of 205 feet. We use the three tower array for a nighttime southeastward directional pattern and the center tower for a daytime omnidirectional pattern. The center tower also supports the antenna for WJLQ-FM. WCOA uses a CCA AM5000 transmitter. *We felt we needed a little more coverage that night, so you heard us non-directional.*

WJLQ is an automated FM broadcast station with an effective radiated power of 25.5kw non-directional fed by a CCA FM10000 D transmitter operating at 6100 watts of power. WJLQ broadcasts in stereo 24 hours a day on 100.7 megahertz.

We appreciate your interest and hope you will monitor us often. If you are ever in this area, we would be very happy to show you around our station.
