RE: Reception of KSNN AM

Dear Mr. Lindblade:

It is my pleasure to verify your reception of KSNN-AM, Pocatello, Idaho, on the date of November 16, 1976 between the times of 5:12 P.M. - 5:16 P.M. MST.

KSNN-AM operates upon the assigned frequency of 1290 Khz with 1,000 Watts of power.

I am pleased to know that we are the most distant station that you have been able to receive.

You may find it interesting to know that for some reason (possibly our excellent ground conductivity) we do receive numerous reception reports from great distances. Our longest reception took place in either 1961 or 1962, when we were received loud and clear in Bamberg, Germany. The party was so anxious to have the reception verified that he telephoned us, and verified his reception by placing the telephone next to his radio.

Cordially yours,

Dan Libeg
