Dear Sir,

We are pleased to hear that we were picked up as far as you have indicated in your letter dated April 2. The information you have listed is correct. Our station was on for program test and equipment test on the date indicated from 1:00AM to 1:30 AM.

The transmitter we have is a Raytheon model RA-250 with 810 final tubes, with a power output of 250w. The tower is 103' guyed tower, located approximately 1 mile south of Paoli, Indiana.

Thank you for taking the time and interest to write to us with this information. We try to cooperate with all NRC members who write to us with contacts.

Yours

James E. King  
General Manager
