Eastern Kentucky's Only Clear Channel Station

Pikeville, Kentucky

5000 Watts - 900 On The Dial

Telephone 437-7323 Area Code 606

September the 14, 1975

Mr. Rolland L. Lindblade
1017 N. 90th Street #2
Omaha, Nebraska 68114

Mr. Lindblade,

Thank you for your reception report. Sorry to be so late in replying to your report. Your findings were correct, at that time of the morning, and that date of the month, I was conducting the stations remote frequency measurement. So far your reception report is the second furthest to the west of this station. If my memory serves me correctly, during the same month of your reception, during the same time period, I received a reception report from a gentleman north of Los Angeles, California, not bad for 5000 watts. But you have to account for the fact that at that time of the morning, only the Canadian and Mexican stations are on the air .

Thanks again for your reception report..

Cordially,

Norman Beaty C.E.
