

TECHELAND BROADCASTING, INC.

February 16, 1978

Hi, Rolland,

This letter will confirm your reception of KNIR on the morning of February 2. The testing you heard from 12:31 to 12:46 AM, CST, was being done by our chief engineer, Tom McClure. We appreciate your taking time to log the various bits of information included in your letter.

KNIR is a thousand watt daytimer, but we are continuing our long, uphill battle with the FCC to get nighttime authorization. Also, we are making plans to build new facilities, with new equipment, and possibly, AM stereo broadcasting. You and the other members of the club may want to keep your fingers crossed for us.

Yours truly,
Rick Broussard
