Dear Sir:

Thank you for your reception report of October 26, 1978.

Yes, we were on the air as you stated, 4:05 AM on October 23, 1978. During that time we were operating at 1 Kw, N-D. Prior to that time I had been conducting our proof of performance measurements. At that time, I was attempting to track down an intermittent modulator problem.

Thank you,

John Herrbach
