Dear Mr. Rolland L. Lindblade

This is to verify your report of reception of WTRU on 9-13-75.

WTRU is owned and operated by Regional Broadcasters of Michigan, Inc. and licensed to operate on a fulltime basis. Current operation using non-directional antenna is from local sunup to local sunset. The directional antenna is used from local sunset until sign-off at midnight. Operation is on an assigned frequency of 1600 kilocycles using a power of 5,000 watts both day and night. The antenna system consists of four guyed 150-foot towers. The towers are in line, spaced 137 feet apart and bearing 0 degrees azimuth. The north center tower only is used during daytime operation. The signal is predominately north when using the directional antenna system.

The transmitter, large studio, main control room, standby control room, and offices are combined in one building.

The main control room consists of a Gates console, 3 Gates turntables, 1 Magnecord reel type recorder and playback machine, and a 5 Spotmaster cartridge playback machine.

The standby control room consists of an RCA console, 2 Gates turntables, 2 Ampex 350 reel type tape machines, 1 Spotmaster record and playback cartridge machine, and 1 Spotmaster record, playback, and delay cartridge machine.

Transmitting, audio and monitoring units are all Gates Radio Equipment.

WTRU with a staff of 17 is an NBC network affiliate.

WTRU has received SWL reports from eighteen states, two foreign countries, and several reports from New Zealand.

Sincere Thanks for your report and the best in SWL-ing.

Sincerely,

Gerald Heykoop
Chief Engineer
