Rolland L. Lindblade  
1017 N. 90th St. #2  
Omaha, Nebraska

Dear Mr. Lindblade,

Your signal report for the 25th of August was correct.

I had received a signal report for WRJN of Racine, Wisconsin, which I had returned to you. I also included our standard letter for such reports. I appreciate the signal report even if it is a little late.

You may have trouble hearing us now because our modulation transformer in the ITA 5000A is shorted and we are operating at a 1000 watts.

Thank again for the signal report.

Sincerely,

David Schultz  
Chief Engineer
