Dear Sir:

This will serve as a letter of verification of your reception of KCLU on December 7, 1979. KCLU and KCLU FM was conducting broadcast frequency measurements with Commercial Radio Monitoring Company of Kansas City.

KCLU is a 1kW daytime only non-directional station with a pre -sunrise power of 500 watts. We also operate KCLU FM, 94.3MHZ., 3 kW at 230 feet.

KCLU and KCLU FM normally conducts frequency measurements on the second Friday morning of the month from midnight to 12:15 AM. I moved the December test up one week since I was not able to perform the test at the regular time this month.

Enclosed please find our coverage map. Good luck with future contacts and thanks for writing.

Sincerely,

A handwritten signature in blue ink that reads 'Greg Stanton'.

Greg Stanton  
Maintenance Engineer
