

Roland,

I am sorry I'm late, I misplaced your letter and just ran across it. You indeed did hear our transmissions on May 6 1978 which began at 1 AM. It was a frequency check test which is picked up in Lee's Summit, Missouri. The test tone identifies our station for correct frequency check. This included a coverage map as requested (or so I thought)

Thank you very much for your interest in our station

Randy Dimick
