Dear Rolland,

Was happy to hear of your reception of WBLY on the morning of November the 28th. At that particular time I had made some feedback adjustments of the transmitter and had to readjust the modulation.

Incidentally, we will soon be running tests on our new FM transmitter as we are raising power to 50KW about two or three weeks from now. As a result of difficulties we are having with the new transmitter I can't be more specific as to when the tests will actually be run.

I've included a postcard with the specs of the station on it. Thanks again for the DX report.

Sincerely,

Mike Flaharty
