Omaha, Nebraska 68114

Dear Mr. Lindblade:

We are pleased to confirm your reception of KRPT from 5:10 to 5:16PM on 21 December, 1976.

I'm pleased to report that yours is the most distant reception report we have recieved since we began keeping records.

Also, I must apologize for the delay in replying to your report...it's a difficult time of year for us.

KRPT is a daytime station, operating on 850 KHZ, at 500 Watts, with directional phasing @ 116 degrees from KOA. We broadcast from a Harris/Gates BC-500G transmitter and phasing equipment, with two 300 foot antennae.

Thank you for your reception report. A coverage map is enclosed.

Sincerely,

Larry R. Holstrap
