Omaha, Nebraska 68114

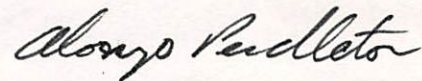

Dear DX-er:

We were happy to receive your QSL. We hope you will try to get fellow DX-er's to work our station and send QSL's.

Equipment here is a CCA 50,000 watt transmitter and a six-tower directional antenna array. Our daytime power is 50,000 watts with a great deal of the power going due south, and a night-time power of 5,000 watts with practically all power going south. Our maintenance shift is Mondays 12 to 4 A.M.

The material supplied in your letter checks to be accurate according to our record of what was actually aired.

Sincerely,

Engineering Department
