Omaha, Nebraska 68114

Hello Rolland:

This will verify your reception of KVNU on November 14, 1977, at 1:17 am MST, at least. Thanks for your excellent report from Omaha. Maybe conditions will be better for the December 19 test and you can hear a little bit more.

We test equipment every MM, usually around 1am MST, on high and low power. Maybe you'll catch us there sometime. Museoften.

Best of conditions,

*Bill Traue*
