Omaha, Nebraska 68114

Dear Rolland:

A check with our station's programming logs show that we did indeed run the spots you logged at the times you have listed.

Please accept this letter as verification of your having received station WQXM.

WQXM broadcasts with 100,000 Effective Radiated Watts from a tower height of 500ft. FM 98 is physically located in Seminole, Florida, which is about half way between our cities of license (Clearwater/St. Petersburg).

I have had numerous letters from all over the southeast recently about persons receiving our signal. I must admit, I haven't had any letters from states such as yours for a couple of years.

Thank you for your listener DX report. I hope you will listen to us as often as possible!

Respectfully,

William D. Elliott
Chief Engineer
