Dear Sir:

This is to verify your reception of KDLS-FM on 23 June 1975 from 8:50 AM to 9:14 AM CDT on 104.9.

And thank you for describing your reception of KDLS-FM. I occasionally pick up DX stations on my own FM receiver at home, but most of my stations that I pick up run 100kw. So I am quite surprised that you could pick up with only 3kw.

I am into DXing somewhat myself. What interests me is picking up DX stations on the medium waves in the middle of the day. So you can see, even though I search for a different type of thing, I myself like to DX also.

Our transmitter is a 3kw CCA going into a Jampro 3 element antenna about 300 feet high.

Thanks again for the reception report and good DXing.

Sincerely ,

Steve Locker
Program Director,
KDLS-FM
