Dear Mr. Lindblade:

After reviewing your letter of July 22, I have found your log to be substantial proof that you actually did receive WKTK, FM. What you tuned into on July 20, was the start of the evening polka show which is aired weekly at 4:30 pm. As a matter of general interest, WKTK's regular format is progressive rock, 24 hours a day, Monday through Saturday. However, on Sundays, as you heard, we have a religious format.

WKTK is a 50,000 watt stereo FM using a CCA model 10,000D transmitter tuned to 105.7 MHz. The antenna is a 5 bay directional giving a horizontal ERP of 45 kw and a vertical ERP of 50 kw.

Unfortunately, I do not have a map of coverage area to send to you. Perhaps at a later date I can drop one in the mail to you. Thank you for your interest and continued good listening.

Sincerely,

Scott Brenner
Chief Eng. WKTK, WPTX
