Chief Engineer
Radio Station KLYD
Bakersfield, California

Dear Sir:

I had the pleasure of tuning your station, KLYD, this morning while you were conducting a test transmission on 1350 kilocycles. I would like to receive a verification of my reception of KLYD if this report agrees with your station log.

Program details: Pacific Standard Time

- 0252 A.M. Medley of selections, continuous, no announcements.
- 0258 Unannounced change of selection.
- 0303 Applause. "... Fats Domino was the leader." Fats Domino selection. -Appeared to have been a recorded program including the announcement.
- 0306 "This is KLYD in Bakersfield, California. We have been modulating with tone and music. We have been on the air for test purposes only. KLYD now leaves the air."

Your signals were R5, S8-9. There was considerable static and slight fading. There was light background interference from other stations on the frequency. The weather was partly overcast with the temperature about 45°. My receiver was a Hammarlund HQ-129X using an 80-foot North-South antenna.

Hope that this report may be of interest to you and your staff and that I may have the pleasure of receiving a confirmation of my reception of KLYD. Thank you very much.

Yours truly,

Norman L. Maguire

Dear Mr. Maguire

We were on the air for equipment tests during the above mentioned times.

Thank you for your interest.

Very truly yours

Vernon Hulse ^{Chief} _{Engineer}
