Dear Sir:-

Your letter dated November 19, 1952, and addressed to Station JOQK, Niigata, Japan, has been referred to this head office, as that station is not verifying reports of reception sent directly to them.

Station JOQK is beaming medium waves only to domestic listeners. Medium waves are reflected from the upper sky only during the night and can be caught at particular localities where reflected beams hit the ground. It seems that your city happens to be on that particular spot. I herewith enclose our QSL card verifying your report.

Thanking you for your continued interest in our broadcasting and hoping your success in catching other stations, I remain,

Yours sincerely,

T. Yoshida
