Norman L. Maguire
101 Hope Street
Stanford, Connecticut
Dear Sir:

I am enclosing a verification card to verify your reception of WAOV on the morning of January 4, 1943. I hope you'll excuse the card we haven't had any new ones printed since we changed power about a year ago. I'm sorry I haven't answered your letter sooner. The engineering staff has changed considerably of late and I am having quite a time keeping up as I'm still in high school. However I'm always glad to receive reports. Connecticut is pretty good DX for us, especially with the weather as you said it was there. I'm glad you said the modulation was all right because it has been giving us some trouble. I guess turn about is fair play, so here goes a general layout of the station. At the studios we use RCA mikes, amplifier, and monitor. We have two lines that are interchangeable, from the studios to the transmitter. One is TALK while the other is BCST. At the transmitter we have a Western Electric program amplifier and transmitter. We monitor with RCA equipment. Our radiator is a 175' Lingo tower.

In closing I wish to thank you for your report and I hope if you ever happen to pick us up again you'll send us another.

Yours truly

Paul Ford

Paul Ford, Act. Chief Eng.
