RAY L. KOZAK, MANAGER

January 30, 1952

Norman L. Maguire
434 North Maple
Albuquerque, New Mexico

Dear Mr. Maguire:

It is with considerable pleasure that I "VERIFY" your report of January 20, 1952.

With an interfering signal of S-7 recorded at our transmitter, it was anticipated that very little response would be obtained to this test broadcast. However, the number and location of reports thus far received greatly exceeds our maximum expectation.

I wish to thank you for your participation in this test broadcast and I wish you the best of clear signals for future DX'ing.

We hope to conduct another broadcast under more favorable QRM conditions.

Yours very truly,

RADIO STATION K M A N

Herbert P. Lavin
Chief Engineer
