FREDERICK, MD.

PHONE 1466

February 27, 1941

Mr. Norman L. Maguire,  
101 Hopè Street,  
Stamford, Conn.

Dear Mr. Maguire:

We are in receipt of your letter dated February 17th and after checking over our log are pleased to verify your report of reception between the hours of 4.45-5.12 $\frac{1}{2}$  PM on that date. WFMD has no "veries" and we trust this letter will serve the purpose you desire.

WFMD operates on a frequency of 900 KC with a power of 500 watts from 6.30 AM (8.00AM) Sundays and signs off at various times after 9.00 PM. During the month of February we change to directional operation at 5.45 PM and for this purpose we use two 257 foot towers; with a single tower alone for daytime transmission. Our directional system is so designed that W F M D transmits a minimum signal in the directions of WBEN Buffalo NY, and WJAX Jacksonville Fla., which operate on the same frequency as us. Our studios are located at the above address, while our transmitter is situated 2 $\frac{1}{2}$  miles from Frederick on a farm 1/2 mile off U. S. Route 340.

Please accept our thanks for your report and interest in our behalf.

Very truly yours,

*John A. Fels*  
John A. Fels,  
Chief Engineer.
