Norman L. McGuire:

Dear Norman:

Sorry you couldn't get me very well. It's really asking a lot of even HQ129X to separate DASH & DITS when they left here garbled! - Yes, I was keying it with the Console on-off switch. I later quit trying to key it. (mine is HQ129X, too) -

listen for me (W5RMF) on 40 meters sometime. (7.152 MC)

As far as you go the report checks.
Good luck Norman & thanks for writing -

Sincerely -
Lauris A. Palmer
