Albuquerque, New Mexico

Dear Norman,

Thanks for the reception report on our frequency check last Sunday night, September 18th.

Your account tallies with my log, so you can consider this confirmation of your reception. Your S report is close to one received today from Vallejo, California. The same Big Springs, Texas station was picked up there, too. As well as from an Amarillo, Texas report I received yesterday. Seems that they have a pretty good coverage.

Thanks again for the report. We program normally Monday thru Saturday till 2am on 250 watts. Let us know if you ever get a program signal.

Cordially,

*Bill Murray*
