VERIFICATION LETTER
Frequency check - 2/11/52

Norman L. Maguire
J5HXF
434 North Maple
Albuquerque, New Mexico

Dear Norman:

Sorry for the delay in answering your letter of February 11, 1952.

Station K L C B, Libby, Montana, was on the air for a frequency check with R. C. A. Communications, San Francisco, on the date you gave. The report agrees with our station log.

We are enclosing a booklet or pamphlet entitled "Nature's Playground", which was mentioned on that particular check. It gives an idea of the beautiful scenery in this section of the country....it is one of the last "wilderness frontiers" in the United States!

You may be interested in a few side-lights on K L C B itself. We are in our fifteenth month of continuous operation. We have a staff of "three".....my husband, Oliver G. Coburn, owner-manager, takes a full "trick" on the board and it is he who conducts the frequency checks each month. We have one operator - Bill McCoy - who has been with us since October 1951. Bill works a full week, and does all maintenance work. I do all the incidental work such as copy-writing, programming, and correspondence! Until the advent of Bill McCoy, we operated by ourselves! It is hard to convince operators with "first phone tickets" that this country has possibilities! We operate a 12 1/2 hour schedule seven days a week. Our tower is a shunt-fed, steel "smoke-stack" 150 feet high.

Thank you for your report.

Sincerely,

Mary Elizabeth Coburn - for K L C B
