re: Test, March 23, 1950  
2:15 AM MST

Mr. Norman L. Maguire  
434 North Maple  
Albuquerque, New Mexico

Dear Mr. Maguire:

Thank you very much for your fine letter reporting reception of our test signals on my recent frequency test. The test you heard was our regular monthly frequency test with RCA at Point Reyes, California.

KSRV has a power of 250 watts on 1450 kc. We use a 180 foot guyed tower series fed.

Yours very truly,

C. E. Harland  
Chief Engineer  
(W7IAN)
