October 14, 1960

Mr. Norman L. Mcguire,
W5NXP
1420 Columbia Dr. NE
Albuquerque, New Mexico

Dear Mr. Mcguire:

I am glad indeed to be able to confirm your reception report of WLSC on the morning of August 29, 1960 from 0540 to 0543 A.M.

Interference experienced at that time was probably from the Mexican power station XERF. If XERF were on at that time I am a bit surprised that WLSC even penetrated the area with a signal, at all readable.

Thanks for the report.. and if you're ever able to read us again please let menknow.
