JOHNSON CITY, TENNESSEE

January 17, 1948

Mr. Norman L. Maguire  
434 North Maple  
Albuquerque, New Mexico

Dear Sir:

Thank you for your letter of January 8, 1948. Your report compares with our log for that morning.

We are using Raytheon equipment throughout with the exception of a Doelittle frequency monitor and a General Radio modulation monitor. Our transmitter is a RA-1000 and we have had some comment on its tone quality. We have a 265 foot Wincharger tower fed by a six wire transmission line.

Our chief engineer made the frequency measurement on the morning of January 8, and as you might guess he is a ham (W4AOY).

Best wishes from all the gang here at WETB.

Sincerely,

*Ruth Ratcliffe*
