600 N. University  
Albuquerque, New Mexico

Dear Norman:

Thanks for your report on reception of KMAC on the morning of Nov. 11th when we were on the air with our regular frequency check.

Your report is very complete and it indeed appreciated, may we hear from you again in the future.

Here at KMAC we have a Western Electric 250 watt transmitter and associated speech equipment, this feeds into a 179 foot quarter wave vertical Blaw-Knox antenna.

Thanks again for your report

Keep them flying and remember Pearl Harbor

Sincerely yours

  
Chas. F. Harris - Chief Operator
