The South Plains Station with Sales Impact in the Rich Agricultural and Oil Centers of West Texas

LAMESA, TEXAS

12/2/47

Norman L. Maguire
434 North Maple
Albuquerque, N.M.

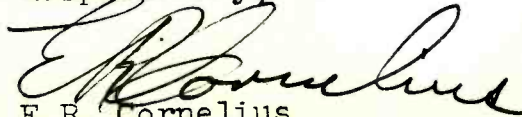

Dear Sir,

This is to verify your report of reception of our station on November 23, from 5:30 to 5:45 P.M. Your report of our program at that time is correct.

Our transmitter is a Gates 250 watt, with a 285 ft. Antenna. The ground system is 120 radials 300 ft. long.

We would like for you to try to receive us often, and if we ever put a strong signal in Albuquerque during the day, due to any freak conditions, we would certainly like to hear from you again.

Respectfully,

E.R. Cornelius
Chief engineer
