SECY.-TREASURER

Mr. Norman L. Maguire
434 North Maple
Albuquerque, New Mexico

Dear Mr. Maguire:

Thank you for your report on the reception of KULP on the morning of March 4th. The report checks with our log so please accept this as your verification. We are always glad to receive these reports.

We also have your letter of March, beg pardon, that's Feb. 12 reporting that you heard us on Feb. 1st. This earlier report did not check with our log as we were not on the air at the time you gave so could not verify. I had intended to answer anyway and explain all about it but there seems to always be something to keep me busy.

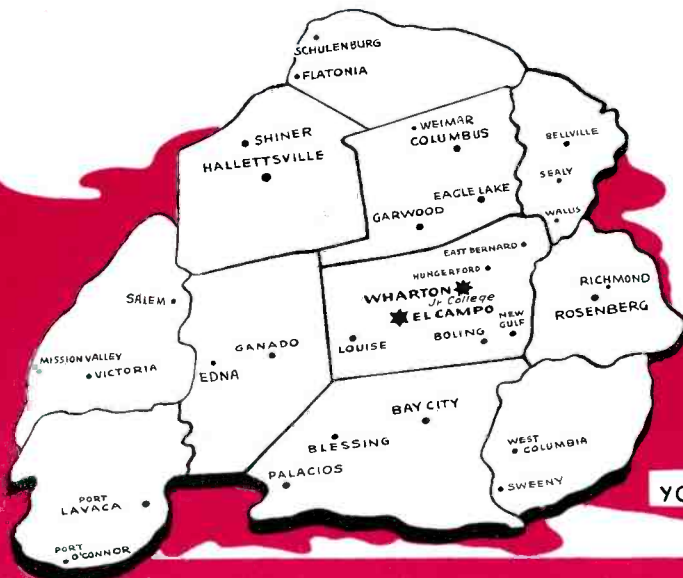

The equipment here is essentially Collins with the exception of the turntables, which are Presto, and the modulation and frequency monitors, which are General Radio. The transmitter is a Collins 20T and is coupled to a 200 foot overall height tower that is series-fed.

Again I say--many thanks for the report and "happy DXing!"

Very truly yours

Joe H. Miller
