

KORL

Radio Honolulu, Hawaii

January 13, 1961

Mr. Murray Mann
3702 South 17th
Omaha 8, Nebraska

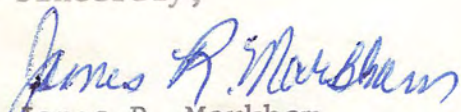

Dear Mr. Mann:

This will verify your reception report of our station. Thank you for sending the tape which is being enclosed in the return mail. As you might know, we have recently changed our call letters from KPOA, and KKAA to KORL! We still operate on 650 KC with 10,000 watts of power, and have a self-supported 330 foot tower. We do not, as yet, have a coverage map---however we find that the majority of our DX reports are from New Zealand and Australia, some from British Columbia and a scattering from the continental United States, the majority of these from various points along the East and West coasts and a few from the Middle West states.

Thank you for writing us---it is always a pleasure to hear from our distant listeners.

Aloha and Mahalo.

Sincerely,

James R. Markham
Chief Engineer
