THE PIONEER VOICE OF KANSAS

RADIO CITY - 42nd & BROADWAY
TEmp 8-3377 WICHITA 1, KANSAS
September 11, 1958.

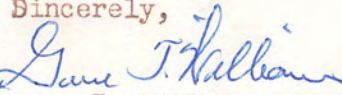

Mr. Murray C. Mann,
3702 South 17th Street,
Omaha 8, Nebraska.

Dear Mr. Mann:

Thank you very much for your report of August 11, 1958.
The report was correct in so far as we are able to check. Please excuse
the delay in replying.

KFBI operates with 10,000 watts non-directional during
the daytime, but with only 1,000 watts directional during the night-
time, and the signal is pulled in severely both to the east and to the
west, so our reception in your location is highly unlikely and was no
doubt due to unusual conditions.

We were pleased to receive your report,

Sincerely,

Gene T. Williams,
Chief Engineer.
