Dear Sir:

Thank you for the very fine DX report received yesterday.

WCRM operates with a power of 250 watts into a 2 tower directional antenna. Our ground wave signal reaches out very well. On Sky-Wave, I have reports as far west as Denver Colorado, east to the Coast, -not too distant south and north, although our signal strength is better in these directions than in the easterly direction.

Thanks once again for your report. I'll be glad to hear from you anytime.

Sincerely,

Norbert C. Poeppelman  
Ch. Engr.
