

RADIO OKANOGAN

December 8th 1977
Omak, Washington 98841

Hi Carl:

Definitely you did pick us up here in WASHINGTON STATE on our test of Nov 7th of this year. We did in fact play the stars and stripes forever at the time it came into IOWA at 12:18. Thank you so much for your letter.

Your TMC did a good job in there. We are nestled in the mountains here and have a 285 foot tower on 680 and as you may well know it is NOT a full $\frac{1}{4}$ wave stick. That is why it gets to the sky wave even tho the frequency is long.

We also heard from Nebraska, Michigan, Calgary, Colorado, Tenn, and a few more in that area. Just California and Oregon on the west coast area tho.

I held off answering so I could let all of you know, (personally) who all we heard from. If all of you guys were good enough to write great, in fact excellent letters to me, I thought I would take the time to answer each and every letter too.

Carl, we just got our new FM license and we will be going on the air on 92.7 soon with country Stereo. Being a daylighter it will be nice to give people night radio here. There is no local they can get. Just fading night radio with no local coverage for news or anything for that matter. Oh sure we get the temperature at 8 at night in Frisco, but tonight the thermometer reads 10 above but I'm sure KNBR will not read that temp. HA HA.

Thanks again for writing and stop by if you ever make it up here in the mountains and just ask for the "Rimrock" on channel 23.

• You can tell it better on KOMW every day • Sincerely, Jerry Robinson C.E.
