## VERIFICATION OF RECEPTION

Jan 20, 1992, 0259-0330 GMT

7265 kHz 100kw

Botswana Relay

To improve VOA reception in Africa, four 100-kilowatt Continental shortwave transmitters are entering service at Moepeng Hill, Botswana. Two are scheduled to go on the air in December 1991, and two in early 1992. The transmitters are connected to curtain antennas, two directed to west and central Africa, two to east and central Africa. VOA programs are fed from Washington to Moepeng Hill by satellite.

Carl Mann

Omaha, NE

Thank you for your interest in VOA.  
We hope you will continue to enjoy  
our program.
