"The heavens declare the glory of God, the skies proclaim the work of his hands.  
...Their voice goes out into all the earth, their words to the ends of the world"  
Psalm 19:1,4 (NIV)

**NEWS FLASH!** On July 4, 1979, Radio 4VEH, Cap Haitien, Haiti, began regular test transmissions on 1595 Khz using a new experimental skywave antenna and a converted 1000 watt Collins Amateur transmitter. The antenna, which can be called a lazy-quad, is a cubical quad 154½ feet on each side positioned to beam nearly vertically with an 11° tilt toward 195° from true north to favor coverage of Haiti on the first skip. About 60 feet below the active element is a slightly larger quad reflector. The quad antenna and reflector are held up by four 120-foot steel towers, each with a base insulator and nylon guying cables.

Radio 4VEH will be conducting skywave radio tests on 1595 Khz during the rest of 1979 and the first half of 1980. We are very interested in receiving individual reception reports and monitors' reports of reception during the entire test year. A special QSL card will be sent to verify all correct reception reports. Monitors will receive the QSL in response to their first report, then the monthly skywave test special verification for all monitors' reports at the completion of the test transmissions in July, 1980. (Approximate power of XMITR/ANTENNA is 3000 watts ERP)

For July and August 4VEH's Radio Skywave is scheduling English and Spanish on Sundays 0500-0900 and 1200-2100 EST (1000-1400 and 1700-0200 GMT). French and Creole broadcasts are scheduled for the rest of the week Monday through Saturday between 0500 and 2100 EST (1000-0200 GMT). There may be some additional hours of tests, and this schedule is subject to change. Changes will be announced at the end of our regular news broadcasts in English at 0700 EST (1200 GMT) Monday through Saturday. Listen on 1035 Khz or our two shortwave frequencies. \*continues in Sept. & Oct.

If you wish to participate in the skywave radio tests and receive the special QSL card, send reports to: 4VEH - Radio Skywave, Box 1, Cap Haitien, Haiti, West Indies. Monitors' reports for those reporting regularly during the test year should be sent to this special address: 4VEH - Radio Skywave, Box 1739, Port-au-Prince, Haiti, West Indies.

We are thankful to the late Clarence Moore, of Crown International in Elkhart, Indiana, for developing and planning this antenna, and for his sons and members of the Crown staff who have given their time and efforts to help. Praise the Lord!

s/on is usually between 0450-0500 EST

with music before anthem & opening Gaudin Charles, Director

Spanish announcements Sunday, French/Creole on other days. This may be best time for you?

We have had strong m/w openings for the past 2 weeks
