## TUNING IN TO POLISH RADIO 5

...requires the simplest of equipment. Most popular are the shortwave broadcasts. PR 5 broadcasts are also transmitted via satellite, rebroadcast by the World Radio Network as well as affiliate stations on AM and FM. Selected broadcasts are also available on Internet Audio at <http://www.wrn.org/audio.html>.

To tune in to Polish Radio 5 all you need is a radio receiver which picks up shortwave preferably with digital tuning: just key in the frequencies listed below and let the radio tune in by itself. Traditional radios are excellent, too - they just need a little more patience.
