

Radio for people of good taste

WLIQ 5,000 Watts

JEMCON BROADCASTING COMPANY, INC.
303 ST. FRANCIS ST., MOBILE, ALABAMA

Dear Mr. Moss,

Confirming your letter of October 14, 1961
WLIQ was on the air from about 0115 to
0124 CST October 13. We were transmitting
ND at 1 kW for the purpose of a
frequency check. We normally transmit
daytime directional at 5 kW, with our
pattern extended to the Southwest from
Mobile. It's interesting to know that we
bounced any kind of a signal up your way.

Sincerely

Frank Sturgess II
