HOT SPRINGS, ARKANSAS

Telephone 3888
113 Third Street

February 26, 1953

Mr. S. R. Morss,
Route 3,
Bradford, Massachusetts.

Dear Mr. Morss:

This will verify your reception report on KBHS dated February 4, 1953. Please forgive our delay in answering your DX. I trust that you understand the situation.

Hot Springs has three new kilowatt stations. KTBS, a ten-kw job is due to move to Little Rock about April the first with 50,000 watts. We have one other station, Radio Station KWFC, a 250 watter.

All of our equipment is Gates. At present, we do not have our frequency monitor. We run a frequency check with Commercial Monitoring in Kansas City each morning from 5:50 to 5:55 prior to going on the air at 6:00. Of course, that would probably be drowned out up your way by a closer station.

Wishing you continued good reception, I remain

RADIO STATION KBHS

Osmond Pence
