Mr. S.R. Morss

Route 3

Bradford Mass

Dear Mr. Morss:

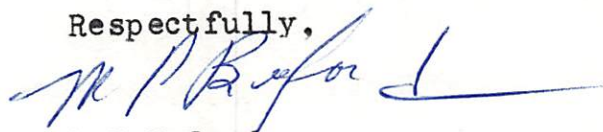

Thank you for your letter confirming our
equipment test last Sunday.

You were listening to a composite transmitter which
had been dragged up out of somebody's cellar, circa 1930,
and had been reconditioned by the station owner, Mr.
Jerry Scanlon, who is also a consulting engineer.

The transmitter was working into a galvanized iron tower
1/8 wavelength long.

Come see us.

Respectfully,

M.P. Buford
