Route 3
Bradford, Mass.

Dear Sir:

This is to verify the reception of our station
on Dec. 28, 1946 at 12:00 A.M. PST.

The equipment consists of a composite onehundred
watt transmitter working into a "T" type antenna
195.5 feet above the ground. The radiator is
located $34^{\circ}08'N$ $118^{\circ}06'W$. The final amplifier
consists of a pair of 203A's class C amplifier
plate modulated by a pair of 838's.

Thank you very much for your comments on the
program material and its reception. We would
appreciate hearing from you in the future.

Yours for better listening.

Marvin Jahn
