Mr S R Morss
National Radio Club
325 Shirley Ave
Buffalo 15, N Y

Sirs;

Very pleased that you could pick me up on Nov 24th. I was Broadcasting for Frequency test purposes and using a long play instead of the tone. It must have been a wave off the ionsphere since i am only a kilowatt. However I was picked up with a good signal in Okla City and Mr K F Borden in Ponca City Okla said I came in with as S9 plus "Just like you were right here in town". Weather was slightly above freezing and clear. We are at 6,200 Ft.

I have a kilowatt Western Electric Dougherty transmitter and operate slightly under power and slightly under on modulation because I am too close on the town.

I am my own Chief engineer and frankly there is very little engineering to be done. It is a very stable circuit.

Thanks for the letter and I am happy to Verify that you did receive K F L J on November 24th between midnight and 12,15 ~~EA~~, A M

Sincerely,

Floyd Jeter
