Mr. S.R. Morss  
Route # 3  
Bradford Massachusetts

Dear Sir:

We were glad to have your D X report on our Dec, 28 transmission.

With the SX 42 and especially the 400' wire it is easy to see that your DX pursuits are successful.

We operate a Gates 250 A to a pair of 805's in the final. Antenna is 154' vertical. DX propagation was very good in your direction this time.

One of our engineers ; Bob Duffy, was born in Bradford, and he got a special kick out of the DX report from there. He has written some personal information on the bottom of your letter which I will forward to you, as I cant decipher all of it.

73's and best of DX,

*Bonner Z. Baker*
