

KPUB

4211 N. ELIZABETH
PUEBLO, COLORADO
TELEPHONE 545-5370
AREA CODE 303

Mr. S. R. Morss
R-3, Bradford,
MASS.

Dear Mr. Morss:

Thank-you for writing us. You did indeed hear RADIO STATION
KPUB at 0125 MST on JAN 3 1966.

KPUB RADIO utilizes a Gates BC-1T transmitter for operation on
1480 kc., feeding two-135 foot series excited, base-loaded vertical
radiators for directional coverage. All programming is done by a
unique Shaffer model 800 Automation system, one of several of its
kind in operation today.

We encourage further correspondence, since the transmission you
heard was a special test broadcast, in the hope that you will enjoy
our regular programming.

Thank you for you interest in our station,

RADIO STATION KPUB
