Dear S. R. Morss:

Thank you for your reception report of WNNR on 1220 kHz from November 29, 1986. It was very complete, in fact, the most complete DX report we've received, and we have received several since the Mexican agreement was signed allowing us 24 hour operation.

Your accurate report occurred during the last seven minutes of our 500 watt (first hour past sunset) operation; at 5:30PM we dropped to 320 watts, our second and subsequent hour power.

Thank you again for your reception report of WNNR!

Sincerely,

Pete Salant
President & General Manager
