Dear Sir:

Received your reception report and was happy to know that you received us with no interference.

WMMB is located on the banks of the Indian River, with our antenna, a 230' stainless set 250' out in the lagoon. We have Collins Transmission equipment, with RCA turntables, and have added Gray arms for lateral work.

Your report is correct as checked against our log book. We will be testing for another week, at least, so maybe you can pick us up again.

The weather here is slightly warmer than in your section of the country. The temperature rides between 85 and 95 degrees during the day, with a slight drop in the night. The fish have been biting like mad lately, so if you are ever in this part of the country, drop in and see us, will you?

Thanks again for the report, and keep up the good work.

Sincerely,

Bill Gray
Bill Gray
Chief Engineer, WMMB
