Nov 17<sup>th</sup> 1954

Mr. S. R. Morse  
Bradford, Mass.

Dear Mr. Morse:

I am pleased to verify your report of the equipment test Nov. 7<sup>th</sup> 1954.

A transmission for frequency measurement is usually conducted by WMOP the first Sunday in each month from 5:35 until 5<sup>53</sup> AM EST

It is interesting to learn of the coverage during early morning operation. Central Florida is about the limit for the sunrise to sunset schedule.

Many thanks for the report.

Yours very truly  
WMOP

Lloyd H. Lutz - Chief Engineer
