February 8, 1969

Mr. S. R. Inorss
R. 3
Bradford, Mass. 01830

Dear Sir:

Thank you for your report of reception of WQBA on the afternoon of February 3, 1969.

You are correct as to the cause of the 6:15 PM fade-out since this is power-change time for the month of February, and after this time we are highly directional.

I trust that this will serve as verification of your report.

Cordialmente,

WQBA-RADIO CONTINENTAL

Hello again,

Glad to be able to verify your fine reception report of our Equipment Test broadcast of 2/27/56 between 4:31 and 4:45 A.M. EST. I am new to W D C F, also new to broadcast radio work. I started at W D C F on November 8, 1955 as Chief Engineer and Announcer. When we received your second letter regarding your hearing the station from Hy. #41 near Masaryktown, I made sure you got your tourist verification. I am glad you belong to NRC and so knew about our test broadcast. Thank you very much for your report, and you're more than welcome to any efforts I may have contributed.

Yours truly,

George Strait

FULL TIME

W L C O

SERVING THE GOLDEN TRIANGLE

EUSTIS, FLORIDA

EUSTIS - TAVARES - MOUNT DORA - UMATILLA

March 14, 1956

Dear Mr. Morss,

It certainly was wonderful to hear from so many of you N R C members. When I cranked up our little 250 Watt coffee-pot on January 23rd at 3.30 A. M. Eastern Standard Time, I had no idea that so many ears and antennas would be pointed in the general direction of Eustis.

This (although typically radio-late) is to verify your reception of our specially arranged N R C broadcast on the aforementioned date. That definitely was W L C O that you heard. Thanks to all for your many gratifying comments. It sure took the curse off getting up so early.

Winner of the box of Citrus from the Livingston Fruit Company, Eustis (which, incidentally, was modified to jams, jellies, and other less perishable Florida goodies) was K. A. Mackey in Dunedin, New Zealand. Aside from New Zealand, Canada was the only other country outside of the U. S. A. heard from on this broadcast. The States were well represented from coast-to-coast and border-to-border, for an over-all total of 63 replies.

Would like to have been able to write a personal note to each one of you, but, with being tied up at W L C O, and making a change of jobs, it is necessary for me to take this easy way out. Right now I am lying on Florida's prettiest beach, soaking up the sun that only Florida can boast, and dictating this to my favorite Secretary, Mom. Tomorrow morning I leave for my new job at W R O D in Daytona Beach, Florida. (If you haven't logged them yet, let me know and we'll rectify that.)

Till I see you on the air again, 73s to you all!

Radiocordially,

Nancy Cox

December 23, 1957

Gentlemen:

This will verify your report of reception of Radio Station WGMA, 1320 KC, Hollywood, Florida, on Monday morning, December 16, 1957, between the hours of 3:30 to 4:00 A.M. E.S.T.

WGMA is licensed to operate with 1000 Watts of power, however due to technical difficulties beyond our control it was necessary to operate with only 600 Watts of power, during the broadcast.

The announcer conducting the program was the executive Vice President of Home Federal Savings & Loan Association, Mr. Robert Landis, an avid radio fan. Mr. Fred Wheelahan, our program director slept through the program having forgotten to mark his calendar correctly.

We are enclosing a coverage map of WGMA and a WGMA, Home Federal Hurricane Map as a souvenir of the broadcast.

We would like to take this opportunity to thank you for your report of reception of WGMA, and may we wish you the best of DX in the future.

Sincerely,

Charles C. Castle

Dear Mr. Morss,

Please forgive the delay in answering your letter concerning our DX test but I have been on vacation and unable to answer the reports on hand.

Right now I have two of your letters before me so if you'll allow me I'll answer them both now.

Before I forget I'd like to verify your report of reception of our station for 16 December 57.

Mr. Morss in your letter dated (sorry no date) you ask me to send you names of operators not mentioning NRC so here they are.

Robert C. Schmarder - PO Box 213 - Corning, N.Y.

Frank S. Johnson - 105 Pleasant St. Concord, N.H.

David F. Thomas - WUMS - Proctorville, OHIO

John T. Tweedie - Box 103 - Oakhurst, N. J.
(above is a member of Newark News Radio Club)

Richard Morris - 218 Virginia Ave - Bridgeport, Conn.

All the other reports were from members of the NRC.

Now a favor. I wish you would print my apology to all operators that sent reports to me for the long delay in answering due to my being on vacation. Thank you.

Before closing, due to the switch in time of the test that morning there was some confusion among the operators and unfortunately some of the operators were unable to log us. Therefore, I am planning to hold another test in the near future for the benefit of those who missed out. Please send me any information you may have concerning the NRC and their work so I may give you some good publicity.

Thanking you for your report I remain,

Very truly yours,

Ronnie Radio

(OVER)

Station WTHR
Panama City, Florida
March 20, 1958

S.R. Morss
Rt. 3
Bradford, Mass.

Dear Mr. Morss:

We are in receipt of your original report detailing contents of our frequency measurement broadcast of the morning of September 10 last.

Although I was not here at that date, I believe I can substantiate the fact that you undoubtedly were tuned to our station, as we go on the air for the same purpose at 1:00 or 1:15 A.M. the morning of every 2nd Friday in the month. Mr. Claude Gray, consulting engineer at Birmingham, Alabama measures our signal.

Thank you for your interest and information. It seems there will always be an aura of mystery concerning the propagation of radio waves, no matter how much we feel we understand the media. Reaching your distance with a 500 watt Gates transmitter is not in our guarantee, but satisfying.

I hope this generalization will serve as a verification. I'm certain a look at the transmitter log would bear you out.

Very Truly Yours

Milton Lovos
